

Auto Motive Spare Car Part Plastic Injection Moulds

ABIS Mold was found in 1996 in Shezhen, adjacent to HK, China. and we moved to Long gang District in 2010. With the advanced facilities from Germany, Switzerland and Japan, and a highly experienced design and engineering team. Our molding press machine ranges from 40T to 650T, 300+ molds capacity each year, and 70 % are exported to Europe and North America.

In addition to our plastic mold and molding specialties, we also can provide you the services such as die casting, stamping /punching, blowing mold, as well as the secondary process.

Product Description

<i>Part Name</i>	<i>Auto Motive Spare Car Part Plastic Injection Moulds</i>
<i>Description</i>	<i>Plastic Injection Mould /Plastic Auto Mould</i>
<i>Country of Original</i>	<i>China (ShenZhen)</i>
<i>Current Export Markets</i>	<i>North America</i>
<i>Lead Time</i>	<i>30 Days</i>

Key Specification

- 1. Plastic Injection Over Mould*
- 2. Cold Runner Mould*
- 3. Plastic Injection Connector Mould*

4. 1*4 Cavity , Ultramid A3K PA66 Material

5. H13 Steel

6. Two - Plate Mould

7. DME Standard Accessories

8. Cycle Time 45s

9. Press 350 Tons

General Information

Item#	Item	Description
1	Mold standard	DME or HASCO
2	Mold Base	LKM,DME, HASCO, FUTABA
3	Cavity/Core Steel	H13,S-7,S136,SS420,NAK80,P20
4	Hot Runner:	MOULD MASTER, MASTER TIP, HUSKY, HASCO, DME, YUDO, INCOE, THERMOPLAY, SYNVENTIVE .
5	Hydraulic Cylinder	PARKER, TAIYO, STAUBLI, JUFAN
6	Mold Components	DME, Progressive, PCS, Punch, Royal, etc
7	Steel Treatment	Heat Treatment, Nitriding, Chrome Plating
8	Surface Finish:	SPI standard, VDI EDM, Texture, etc
9	Texture:	Mold-tech, Yick Sang, Ni Hong ,Tanazawa etc
10	Plastic Material	PP, PC, ABS, PE, HDPE, PET, POM, PMMA, PA(GF), PBT(GF), PVC, PPS, PEI, PEEK, LCP, PSU
11	Design Software:	CAD,UG, Pro E, Solidworks
12	Value-added Service:	Dust-free Spraying, Silk-screen Printing, Ultrasonic Welding, Thermal Bonding, Assembling, Prototype
13	Export Country:	Europe, USA, Canada, Mexico, Brazil, Australia ,Middle-east , India etc

14	Our Capability:	Auto, Aerospace, Household, Electrical, Industrial, Medial, Toys Office, Cosmetic, Outdoor, OA Equipment etc
----	-----------------	---

QC Control

Mold Making QC main steps

Mould Design Control : Design review checklist before submitting to the customer. We will not start the steel purchasing work until get your written approval on our mold drawing.

Incoming quality control: all steel material and outsourcing standard components will be checked to ensure that they are in accordance with the BOM(QTY and material/components name specified).

In process quality control: all the machining and assembling process is under control, we have QC team to check and supervise the tolerance and processed surface to satisfy the requirements. (Mould Steel Hardness Inspection, Mould Electrodes Inspection, Mould Core and Cavity Steel Dimension Inspection , Mould Pre-Assembly Inspection)

Final quality control: within 3 days the completion of the plastic mold, we will have a thorough check for the main size of the molded plastic sample and mold to ensure that the critical or full dimension (if required) are within tolerance.

Mould Pre-Shipment Final Inspection : Free-fumigation three-plywood case packing; make sure the mold is conformity to the approved mold drawing. The spare components and easily broken components and the electrode (if required) are packaged, as well as the mold drawing and some certificated.

Plastic Molding QC main steps

Vernier caliper measurement is performed by trained operators when the first product is produced on our machine, we check the contour dimension and assembly status (if exist) to identify if any

The molded parts are then inspected again by experienced QA department for the full dimensions, especially the critical dimensions set by customer. If quality result was recorded at the same time. Result will be to our QC Supervisor directly. If unqualified dimensions (if exist) are caused by uncontrolled factors or our mistakes and the related actions to improve it.

We will trustily report the T1 result to customer. We will send T1 samples to customers for checking. Sometimes T1 samples need improvement. If T1 samples are required by customer at first, we will take actions to improve the mold to make sure the final product have 0 defects. No shrinkage, warpage, flash, streak, air bubble, step line, ejector mark, and dimension within tolerance.

Package inspection: make sure QTY/color and weight are correct.

Packaging & Delivery

Packaging Details: Free-Fumigation Three-Plywood case

Delivery Detail: 25-35 days by sea, 3-7 days by air

FAQ

Q: Can you do post production?

A:Some customers in addition to plastic injection require post processing, assembly of their products and packaging.

Q:

Is it possible to know how are my products going on without visiting your company?

A:We will offer a detailed production schedule and send weekly reports with digital pictures and videos which show the machining progress.

Q: If you make poor quality goods, will you refund our fund?

A: As a matter of fact, we won't take a chance to do poor quality products. Meanwhile, we manufacture goods quality products until your satisfaction.

Q: What is the software you will use to check the drawing? And what is format of drawing you can check?

A: Our designers and engineers all use VISI and UG to check 2D and 3D drawings.

We can check the drawing with PDF .AI, DWG ,STP or IGS formats.

Q: How can you confirm the plastic injection mold you produce is the one we need?

A: we can provide professional mold analysis reports before mold making.

Q: What can we do if we don't have the mold drawing ?

A: you will only provide the actual sample to us then we can help you to make the design injection mold drawings for your confirmation.

☐ 水纹 Water Wave Marks	☐ 拖花 Scratch Marks	☐ 变形 Deformation	☐ 缺胶 Short Filling	☐ 烧焦 Burn Mar
☐ 冷料流痕 Cold Slug Marks	☐ 困气 Gas Trap Effect	☐ 缩水 Sink Marks	☐ 胶纹 Gap	☐ 气泡 Air Bubble

> 试模过程检查/Tryout Process Check:

开合模动作检查	模具送水检查	流动平衡检查, 填充 30%、60%、90%
模具顶出动作检查	快速填充检查模具排气	填充 99% 检查毛边、缩水与变形

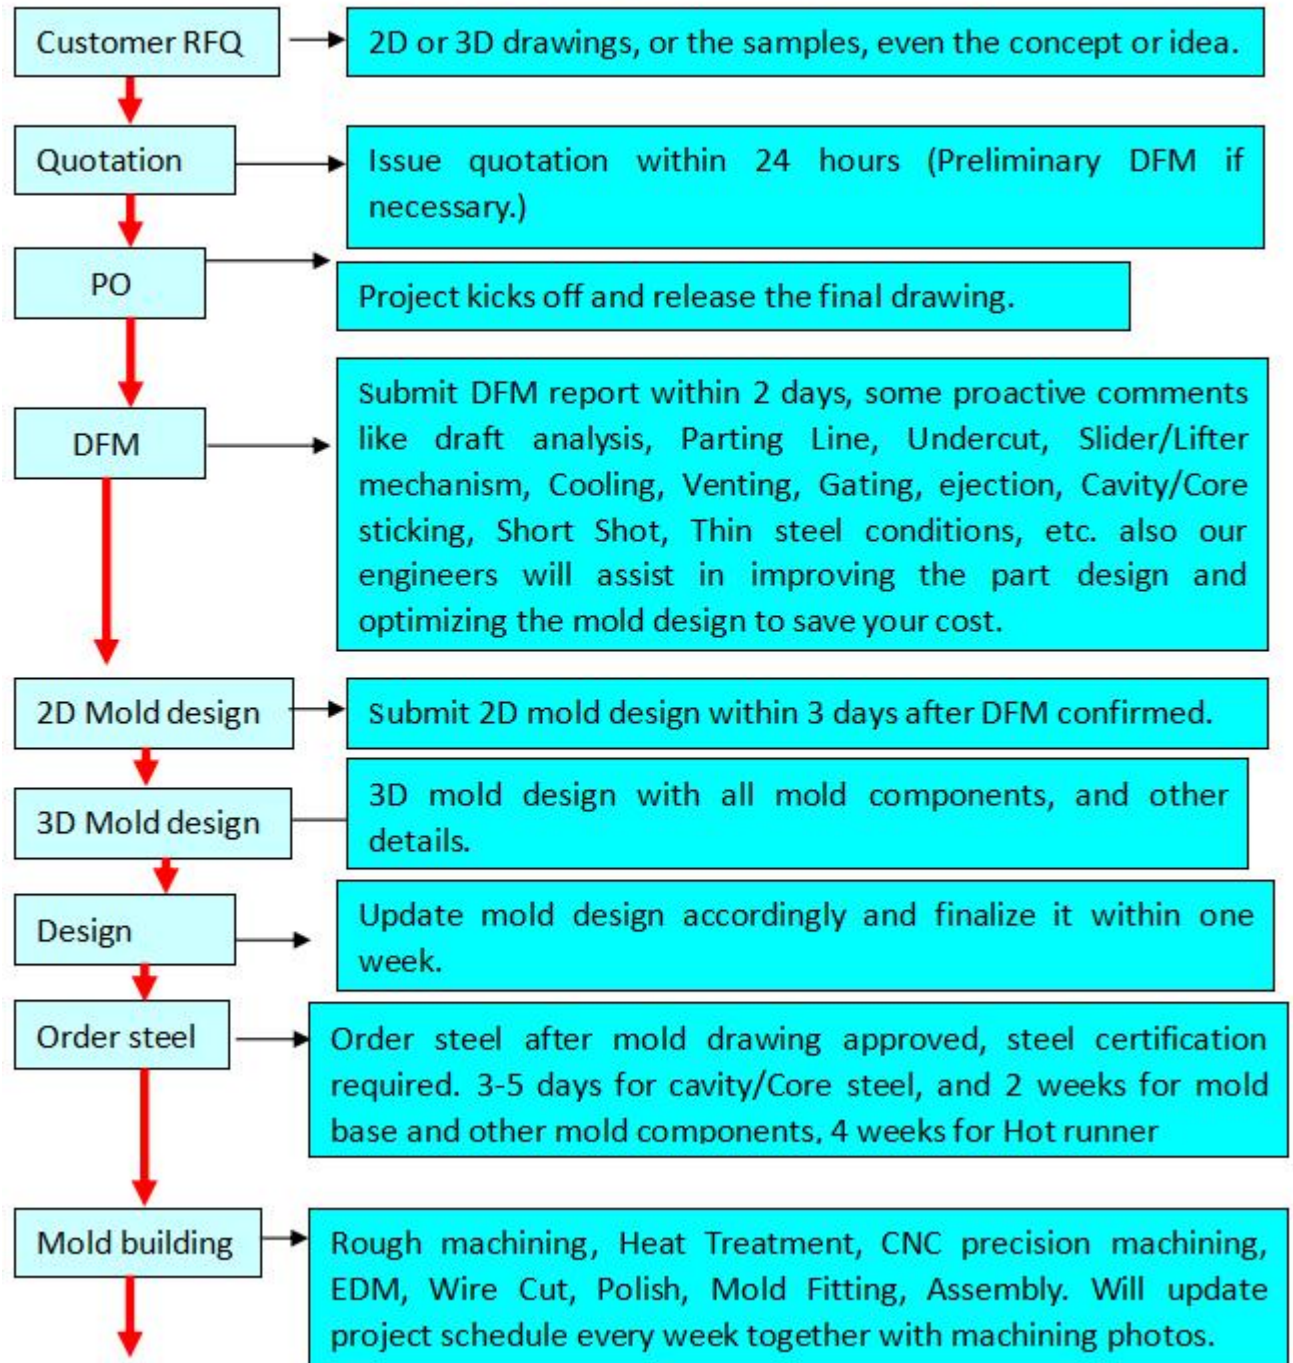

> 试模问题点描述及建议/Comments:

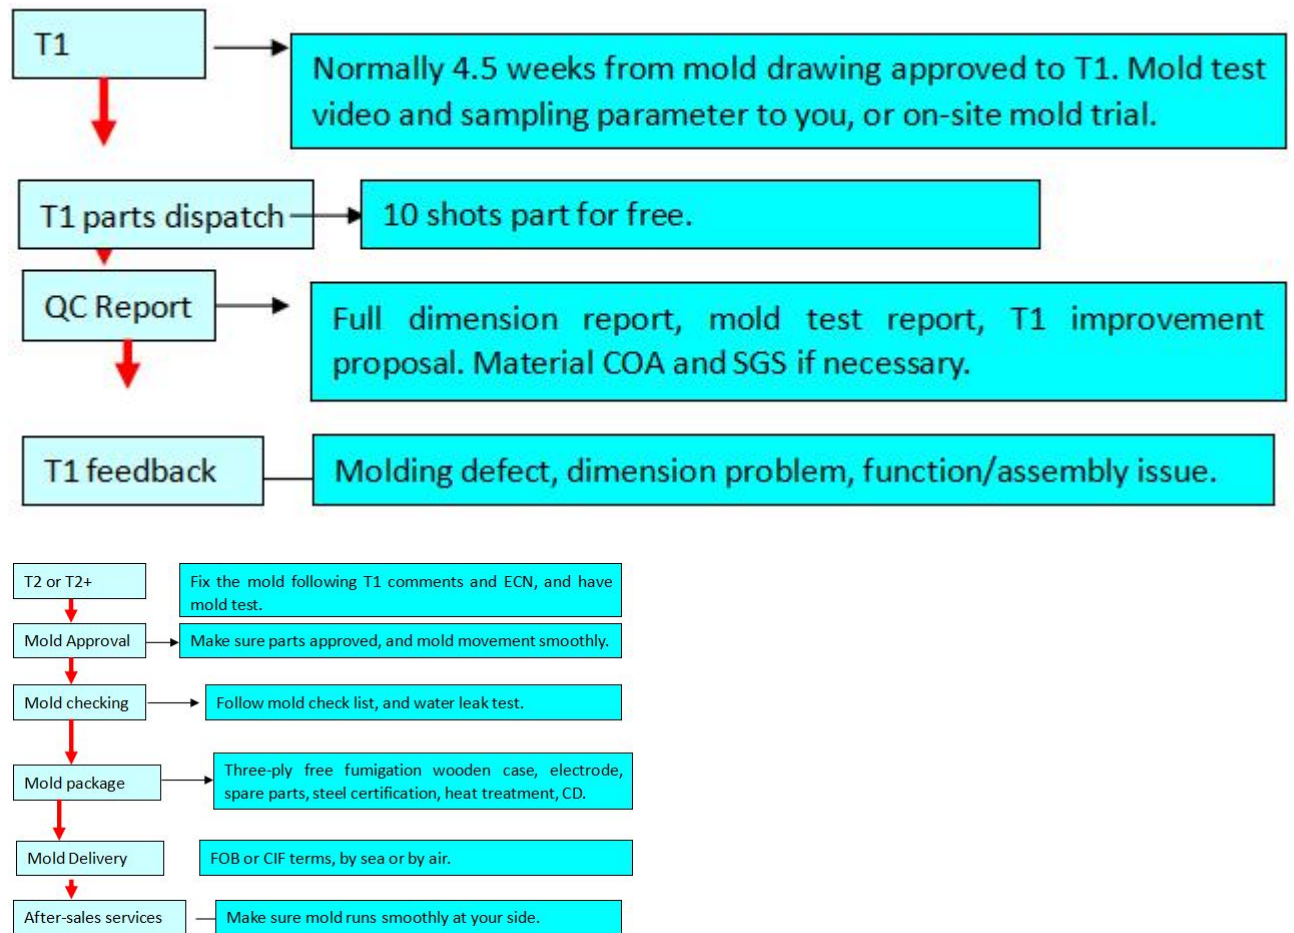

问题: 产品毛边/玻纤纹
对策: 飞模/流道加大/进胶口加大/冷料井加大

BEIJING HANGXIE CERTIFICATION CENTER CO., LTD. QUALITY MANAGEMENT SYSTEM CERTIFICATION ABIS MOLD TECHNOLOGY(HK)CO., LTD. Organization Code: 55388449-1 No.102, Building B, Ying Keli Industry Area, Longgang District, Shenzhen, China. P.C.S is in conformity with GB/T19001-2008 (ISO9001:2008) This certificate is covering the following product scope Plastic Mold Development and Manufacturing; Plastic Products (Not Include the Products With Administrative License) Registration No. 03415Q20263R0M The Duration of Validity: Feb. 10, 2015—Feb. 09, 2020 General Manager: <i>[Signature]</i> BEIJING HANGXIE CERTIFICATION CENTER CO., LTD. After this certificate is issued, there should be at least 2 surveillance audits within the 3-year period of validity of the certificate can be checked on: www.bhcc.com.cn The certificate information is available on the official website of the National Certification and Accreditation Administrator: www.cnca.gov.cn. It is also available by scanning the two-dimensional code at the bottom right corner. Address: NO.7 Jingshun Road, Chaoyang District, Beijing, China.	<i>Certificate</i> Certificate No.: 1141 This is to certify that the Occupational Health and Safety Management System of SHENZHEN ABIS PRECISION HARDWARE PLASTIC CO., LTD. Unified Social Credit Code: 91440300553884491N Registered/Production/Office Address: Yingke Industrial District B Building No.102, Shuanglang Community, Longgang Street, Longgang District, Shenzhen, Guangdong Province, China Sales Address: Yingke Industrial District C Building 1/F, Shaoji Village, Longgang Community, Longgang District, Shenzhen, Guangdong Province, China Has been audited to conform to the following Occupational Health and Safety Management System standard GB/T 28001-2011 idt OHSAS 18001: This Occupational Health and Safety Management System is valid for the development and production of plastic mould; sale of plastic parts and related Occupational health and safety management activities of involved sites Initial issued date: May, 15, 2017 Date of issue: May, 15, 2017 Date of expiry: May, 15, 2020 Issued by: <i>Wu Fongmei</i> Beijing East Allreach Certification Center Co., Ltd. The certificate will remain valid only if the certified organization accepts surveillance audit at regular intervals and is notified to be audited. Please note for surveillance audit monitoring mark on the designated position of the certificate. The information of this certificate is available at EACC website (www.eacc.com.cn) and CNCA website (www.cnca.gov.cn). EACC address: at Floor, No. 121 building, No. 17 Jingshun Road, Chaoyang District, Beijing, China. EACC address: at Floor, No. 121 building, No. 17 Jingshun Road, Chaoyang District, Beijing, China. The 1st Surveillance Confirming Mark The 2nd Surveillance Confirming Mark

QC Control

Mold Making QC main steps

Mould Design Control : Design review checklist before submitting to the customer. We will not start the steel purchasing work until get your written approval on our mold drawing.

Incoming quality control: all steel material and outsourcing standard components will be checked to ensure that they are in accordance with the BOM(QTY and material/components name specified).

In process quality control: all the machining and assembling process is under control, we have QC team to check and supervise the tolerance and processed surface to satisfy the requirements. (Mould Steel Hardness Inspection, Mould Electrodes Inspection, Mould Core and Cavity Steel Dimension Inspection , Mould Pre-Assembly Inspection)

Final quality control: within 3 days the completion of the plastic mold, we will have a thorough check for the main size of the molded plastic sample and mold to ensure that the critical or full dimension (if required) are within tolerance.

Mould Pre-Shipment Final Inspection : Free-fumigation three-plywood case packing; make sure the mold is conformity to the approved mold drawing. The spare components and easily broken components and the electrode (if required) are packaged, as well as the mold drawing and some certificated.

Plastic Molding QC main steps

Vernier caliper measurement is performed by trained operators when the first product is produced on our machine, we check the contour dimension and assembly status (if exist) to identify if any

The molded parts are then inspected again by experienced QA department for the full dimensions, especially the critical dimensions set by customer. If quality result was recorded at the same time. Result will be to our QC Supervisor directly. If unqualified dimensions (if exist) are caused by uncontrolled factors or our mistakes and the related actions to improve it.

We will trustily report the T1 result to customer. We will send T1 samples to customers for checking. Sometimes T1 samples need improvement. If T1 samples are required by customer at first, we will take actions to improve the mold to make sure the final product have 0 defects. No shrinkage, warpage, flash, streak, air bubble, step line, ejector mark, and dimension within tolerance.

Package inspection: make sure QTY/color and weight are correct.

Packaging & Delivery

Packaging Details: Free-Fumigation Three-Plywood case

Delivery Detail: 25-35 days by sea, 3-7 days by air

FAQ

Q: Can you do post production?

A:Some customers in addition to plastic injection require post processing, assembly of their products and packaging.

Q:

Is it possible to know how are my products going on without visiting your company?

A:We will offer a detailed production schedule and send weekly reports with digital pictures and videos which show the machining progress.

Q: If you make poor quality goods, will you refund our fund?

A: As a matter of fact, we won't take a chance to do poor quality products. Meanwhile, we manufacture goods quality products until your satisfaction.

Q: What is the software you will use to check the drawing? And what is format of drawing you can check?

A: Our designers and engineers all use VISI and UG to check 2D and 3D drawings.

We can check the drawing with PDF .AI, DWG ,STP or IGS formats.

Q: How can you confirm the plastic injection mold you produce is the one we need?

A: we can provide professional mold analysis reports before mold making.

Q: What can we do if we don't have the mold drawing ?

A: you will only provide the actual sample to us then we can help you to make the design injection mold drawings for your confirmation.
